

I am a listner to K-LOVE FM 96.9 in Dayton, Ohio, and I am concerned that the K-LOVE signal could be displaced if low power FM replaces FM translator service in my area.

This station provides quality family-friendly programing. There are many radio program formats; however, many are often not suitable for children or those who do not wish to hear foul or suggestive language over their radio. Please preserve the current FM translator service in order to ensure that this type of programming is available for those who want it.

Thank you,

Scott Coffman
